Virginia Garcia Memorial Health Center & Pacific University School of Pharmacy Community Pharmacy Residency Program (VGMHC-PacUSOP CPRP)

2019-2020 Residency Class

The purpose of this residency program is to prepare pharmacists who are passionate about public health to acquire the skills necessary to operate a community pharmacy and to develop Clinical Pharmacy Services in a primary care setting.

The Program Design: Collaborating to provide care for the community

Pacific University School of Pharmacy offers a three-year, year round curriculum leading to the PharmD degree. The school is housed in the Health Professions Campus along with seven other health professional programs.

The resident will complete the Oregon Pharmacy Teaching Certificate Program and will teach alongside faculty in the curriculum. The resident will participate in student learning on pharmacy practice days and will facilitate learning activities for students on APPE rotations. The resident may also participate in Pacific patient care clinics and interview days.

Virginia Garcia Memorial Health Center (VGMHC) Hillsboro Clinic is a Federally Qualified Health Center that serves low income patients through a team-based care model.

The resident will train with a well established Clinical Pharmacy Services team that works directly with patients & providers to maximize medication therapy under collaborative drug therapy management protocols.

In addition to rotations in the clinic, the resident will train in our 340B pharmacy to develop skills in operating and managing a pharmacy in a community health center.

Tuality Healthcare

Located across the street from the Pacific Health Professions Campus, Tuality Community Hospital provides care to many VGMHC patients.

The resident's role in training at Tuality is to gain a complete understanding of how patients receive care across the continuum.

The resident will complete an initial orientation at Tuality, then will perform transitions of care activities to ensure accurate medication reconciliation at admit, participate in discharge planning, and coordinate follow-up visits with primary care providers and the medical team at VGMHC.
